### Wastewater System Update July 25, 2022

The Summer Village Office received calls from Council and residents Sunday afternoon between 3:00 and 3:45 pm regarding a sewer issue at the 9th street beach access.

For a short period of time, (estimated by a resident at 5 minutes), wastewater was coming to surface at the air release valve.

The Summer Village took the following actions:

- Our public works operator was on call and was asked to respond.
- The vac truck was called out to empty the compartments of the ARV and the manhole.
- The pumps were shut down on the properties active on the system.
- Our operator investigated and discovered that the valve in the ARV compartment was not properly seated.
- Our operator inspected and then closed the air release valve.
- The pumps were re-activated.
- The site has been monitored since the incident with no further issues.

The issue was resolved by 5:30 pm.

Appropriate action will be taken with Alberta Environment regarding the issue.
